- **Receive reminder alerts for your next appointment**
- **Restrict Incoming and Outgoing Calls**
- **Control Privileges, Login Password, Autosync**
- **Security: Remote Data Wipe, SSL for Data Transmissions**

#### iPhonebook - Targeting SMB and Government Agencies

With iPhonebook™, you can access all your contacts and calendar events you could ever need (personal, or business) — instantly, wirelessly, and painlessly. With the appropriate administrative privileges, the application synchronizes all the Contacts and Calendar Events into your Phone either from your Administrator's shared Web Page or from your PIM (Outlook, Outlook Express, Windows Mail, Lotus Notes, or Palm).

#### Functionality Addressing SMB Requirements

Remoba iPhonebook provides for a Corporate Administrator to setup Corporate Accounts on a Remoba server. The Administrator can import Corporate Contacts and Calendar into the Web page of Remoba hosted server, create unique corporate groups of contacts (e.g. Sales, Marketing), and assign contacts to specific corporate groups.

Employees can be organized into Groups or Sub-groups. Each group can have its own Administrator. Multiple groups can be controlled by SuperAdministrator.

The Administrator can grant the privilege to allow your mobile phone to access your private PIM from the desktop. This allows you to store all of your PIM data to the secured Remoba servers and it will have automatic backup. With on-line access to Remoba servers, you can view or modify your personal data.

In addition, you may also edit your personal contacts (Add, Delete, Modify), add or edit appointments, track meetings, send group invites directly from your phone and sync these changes to your desktop contact and calendar list.

The Corporate Administrator has exclusive rights to edit the corporate contact and calendar information. Once any edits are made, the updates are made to phones either through a scheduled AutoSync or admin initiated real-time synchronization. No employee intervention is necessary for updating the phones.

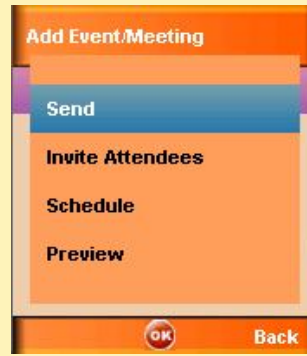

A new Lock-Down feature can restrict call access to and from the phone to the authorized phone contacts approved by the Corporate Admin for the group member. Voice calls can be restricted either Incoming only, Outgoing only, or both. The call restriction can be enabled, or disabled by the Administrator remotely in real-time.

A Data Wipe feature invoked by the Corporate Administrator can remotely erase the phone's login information, contacts, and calendar.

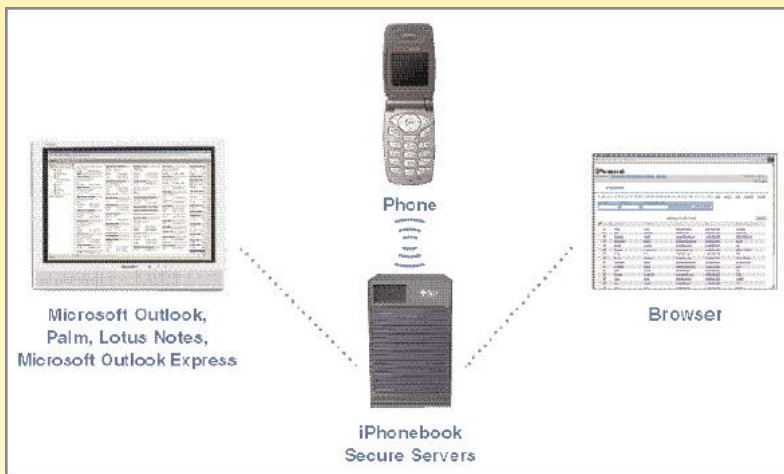

#### See how easy it is to get started with iPhonebook

Just contact Remoba at [www.remoba.com](http://www.remoba.com) to set up a Remoba account and follow the simple Quick Start Guide for Corporate accounts. For individuals, just register as a Remoba member, and follow the Remoba quick setup guide for personal accounts.

### iPhonebook Architecture Diagram

Software downloaded to your PC synchronizes your PIM with the iPhonebook secure servers. You can then access all your contacts and calendar events wirelessly, right from your mobile phone.

### How to set iPhonebook as your Contact and Calendar solution!

1. Contact Remoba Technical Support at support@remoba.com to setup an account.
2. Access www.remoba.com as Admin and import corporate contacts from your database as a .CSV file.
3. Add Additional Employees (Members) to the corporate account.
4. Create Contact and Calendar Groups and assign the groups to appropriate Members.
5. Download the iPhonebook application to Employee phone. Login to the Member / Employee account on Phone and Run 'Sync' to synchronize the updates from the Admin database.
6. To synchronize the updates to the desktop, Install Remoba sync client and Configure to Synchronize all Phone Contacts and Calendar with Desktop PIMs.
